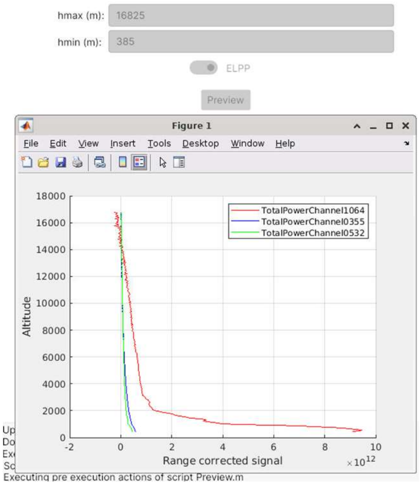
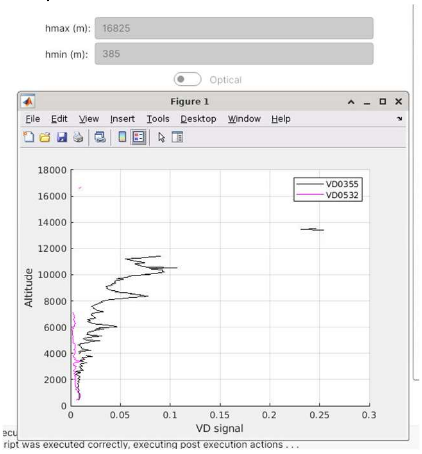
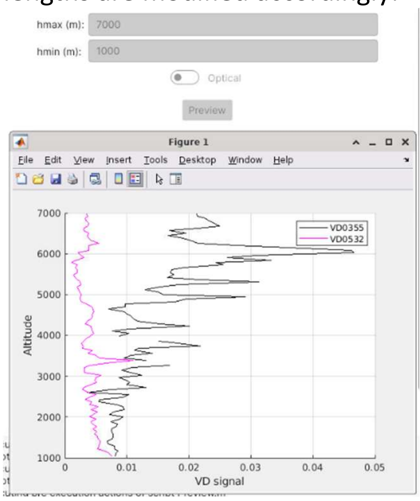
#	Test	Expected result	OK/KO
1	***In Download view:*** Download files from 01/12/2025 to 08/12/2025	When files are downloaded message is shown in log view during Progress is lower than 100% If timeout is reacherd for downloading files message is shown in log view Once progress is 100% all downloaded files are listed	OK
2	***In Download view:*** If timeout is reached during download, download a smaller date range	All files are downloaded correctly	OK
3	***In Download view:*** Uncheck files in list and click button keep selected files	Files that have been unchecked disappear from list and are deleted from project's data folder	OK
4	***In Download view:*** Keep files from diferent times, for exemple:  Move to Data combinaton view	In available measure IDs list only files that have day time measurements appear In the current exemple: 	OK
5	***In Data combination view:*** Select Measure ID	GetHeights.m script executes automatically in order to determine mínimum and màximum heights	OK
6	***In Data combination view:*** During GetHeights.m execution	All buttons are disabled Messages are shown in log: 1. Executing pre execution acitons 2. Executing post execution actions Matlab script Output is being written simultaneously	OK

#	Test	Expected result	OK/KO
7	***In Data combination view:*** GetHeights.m execution finishes	Buttons are enabled Hmax and Hmin value are automatically defined with script calculated height 	OK
8	***In Data combination view:*** Click Preview button	Preview.m script executes	OK
9	***In Data combination view:*** During Preview.m exeuction	All buttons are disabled Messages is shown in log: Executing pre execution acitons Matlab script Output is being written simultaneously	OK
10	***In Data combination view:*** During Preview.m exeuction: before closing figure	All buttons keep disabled Executing post execution actions message is not shown	OK
11	***In Data combination view:*** During Preview.m exeuction:after closing figure	All buttons are enabled Post execution actions message appears in log Configurations get enabled as it is determined in Matlab Output: 	OK

<table>
<tr><th>#</th><th>Test</th><th>Expected result</th><th>OK/KO</th></tr>
<tr><td>12</td><td>In Data combination view:
Execute Preview.m with ELPP option</td><td>ELPP plot is shown:


</td><td>OK</td></tr>
<tr><td>13</td><td>In Data combination view:
Execute Preview.m with ELPP option</td><td>VD plot is shown


</td><td>OK</td></tr>
<tr><td>14</td><td>In Data combination view:
Modify lengths and execute Preview.m</td><td>Plot axis minimum and maximum lengths are modified accordingly:


</td><td>OK</td></tr>
<tr><td>15</td><td>In Data combination view:
Select a configuration ans click “Send data to GRASP” button</td><td>SendFiles.m executes</td><td>OK</td></tr>
</table>

#	Test	Expected result	OK/KO
16	***In Data combination view:*** During SendFiles.m exeuction	All buttons are disabled Messages are shown in log: 1. Executing pre execution acitons 2. Executing post execution actions Matlab script Output is being written simultaneously	OK
17	***In Data combination view:*** SendFiles.m finishes executing	Messages are shown in log: 1. SaveOuputNameInConfigFile message 2. Starting GRASP execution 3. Results will be saved...	OK
18	***In Data combination view:*** GRASP execution finishes	Information window is shown: notifies the user execution finished  All files are correctly saved in Ouput folder for choosen configuration	OK
19	***In Data combination view:*** Send data to GRASP with NaN values on selected height range  	Error is shown  	OK
20	***In Plotting view:*** Click Reload button	Measure ID that have GRASP results in folder are shown as options  	OK

#	Test	Expected result	OK/KO
21	***In Plotting view:*** Select lidar Measure ID Check available measurement files	Only measurement files for this Measure ID are shown All measurement files for this Measurement ID are shown 2. Select a measurement file to show Save figures D1_L_VD-20251203brc1030-4000_7000 D1_L-20251203brc1030-1000_7000 D1_L_VD-20251203brc1030-1000_7000	OK
22	***In Plotting view:*** Select a Measurement file of a successfull GRASP execution and click button "Save Figures"	Script SaveFigures.m is executed	OK
23	***In Plotting view:*** During SaveFigures.m is executing	All buttons are disabled Figures appear in screen while they are being created and are saved in corresponding folder	OK
24	***In Plotting view:*** After SaveFigures.m has executed	All figures appear listed as option in point 3 "Select figure to show"	OK
25	***In Plotting view:*** Select a figure and click "Plot figure" button	PlotFigure.m is executed Figure is shown Buttons are dissabled until Figure is closed	OK
26	***In Plotting view:*** Select a Measurement file of a unsuccessfull GRASP execution and click button "Save Figures"	In both Output and Log is shown error information: Output: "OUT or GRASP data file not found for your configuration in measure " "20251203brc1030" Log: 12-04-2026 18:47:27 || Folder /home/usuaris/csl/mireia.lopez.barron/ondemand/Tests/01122025_06122025/Output/20251203brc1030/D1_L_VD-20251203brc1030-1000_7000/figures does not exist	OK
